JOURNAL OF
ELECTROANALYTICAL
CHEMISTRY

# Contents

*Review*

The surface state and the potential of zero charge of gold (100): a further assessment
A. Hamelin (Meudon, France) . . . . . 1

*Regular papers*

The determination of the apparent diffusion coefficient of HCl in Nafion®-117 and polypyrrole + Nafion®-117 by simple potential measurements
G. Schwitzgebel and F. Endres (Saarbrücken, Germany) . . . . . 11

Linear dependence of the standard ion-transfer potentials of polyanions at the oil|water interface on the surface interaction energy and the charge
K. Aoki (Fukui-shi, Japan) . . . . . 17

Electrotransport of proton and divalent cations through modified cation-exchange membranes
A. Chapotot, G. Pourcelly, C. Gavach and F. Lebon (Montpellier, France) . . . . . 25

In situ Fourier transform infrared study of the electrochemical hydrodimerization of formaldehyde
A.P. Doherty, P.A. Christensen, A. Hamnett and K. Scott (Newcastle upon Tyne, UK) . . . . . 39

Nickel electrodeposition on different metallic substrates
E. Gómez, R. Pollina and E. Vallés (Barcelona, Spain) . . . . . 45

Maximum entropy deconvolution of dielectric and impedance data
T.J. VanderNoot (London, UK) . . . . . 57

Improved model of a polypyrrole glucose oxidase modified electrode
P. Gros and A. Bergel (Toulouse, France) . . . . . 65

Underpotential deposition of copper on Pt(S)-[$n(111) \times (100)$] electrodes in sulfuric acid solution
C. Nishihara and H. Nozoye (Ibaraki, Japan) . . . . . 75

Electrochemistry and in-situ IR microspectroelectrochemistry in a versatile thin layer reflection Fourier transform IR microspectroelectrochemical cell
Z. Li and X. Lin (Changchun, China) . . . . . 83

The effect of a sinusoidal potential perturbation on the active–passive transition region of cobalt in a phosphoric acid solution
M. Pagitsas (Thessaloniki, Greece) and D. Sazou (Nicosia, Cyprus) . . . . . 89

Some new photoelectrochemical insights in the corrosion–passivation processes of copper in aqueous chloride solution under open-circuit conditions
E.M.M. Sutter (Versailles, France), B. Millet, C. Fiaud and D. Lincot (Paris, France) . . . . . 101

Mediated electron transfer across Nafion®|solution interfaces. Comparison with Marcus theory for cases involving Gaussian arrays of mediator couples
E. Sabatani and F.C. Anson (Pasadena, CA, USA) . . . . . 111

Electropreparation of polyaniline in the presence of anhydrous cuprous ions in acetonitrile
N. Pekmez and A. Yıldız (Ankara, Turkey) . . . . . 121

The study of electrode processes of Fe(II)–thiosulphate complexes on mercury electrodes
K. Winkler and T. Krogulec (Bialystok, Poland) . . . . . 127

Microstructured electrode materials in UV–visible spectroelectrochemistry
A. Neudeck and L. Dunsch (Dresden, Germany) . . . . . 135

The vermiculite-modified carbon paste electrode as a model system for preconcentrating mono- and divalent cations
K. Kalcher (Graz, Austria), I. Grabec (Ljubljana, Slovenia), G. Raber (Graz, Austria), X. Cai (Hainan, China) G. Tavcar and B. Ogorevc (Ljubljana, Slovenia) . . . . . 149

Thionine self-assembly on polyoriented gold and sulphur-modified gold electrodes
J. Clavilier (Meudon, France), V. Svetličić and V. Žutić (Zagreb, Croatia) . . . . . 157

Potential dependence of the optical properties of the copper | aqueous borax interface
S. Ceré, S.R. De Sánchez (Mar del Plata, Argentina) and D.J. Schiffrin (Liverpool, UK) . . . . . 165

Spectroscopic investigations of polymer-modified electrodes containing cobalt phthalocyanine: application to the study of oxygen reduction at such electrodes
C. Coutanceau, A. Rakotondrainibe, P. Crouigneau, J.M. Léger and C. Lamy (Poitiers, France) . . . . . 173

Photoeffects during cathodic electrodeposition of CdTe
Y. Sugimoto and L.M. Peter (Southampton, UK) . . . . . 183

Studies of the temperature dependence of charge propagation rates in quaternized poly(4-vinylpyridine) polymers containing electrostatically bound and coordinated redox sites
M. Sharp and H. Larsson (Umeå, Sweden). . . . . 189

Effects of adsorbed CO on hydrogen ionization and CO oxidation reactions at Pt single-crystal electrodes in acidic solution
H. Kita, H. Naohara, T. Nakato, S. Taguchi and A. Aramata (Sapporo, Japan) . . . . . 197

The absorption of hydrogen and deuterium in thin palladium electrodes. Part III: The influence of solution composition
A. Czerwiński, G. Maruszczak, M. Żelazowska, M. Łańcucka (Warsaw, Poland), R. Marassi and S. Zamponi (Camerino, Italy). . . . . 207

The reversibility and overlapping of hydrogen and oxygen adsorption in the "double-layer" region of rhodized electrodes in $H_2SO_4$ solutions (the decomposition of water molecules on rhodium surfaces)
M. Wasberg and G. Horányi (Åbo, Finland) . . . . . 213

*Preliminary notes*

Lithium intercalation/deintercalation behavior of basal and edge planes of highly oriented pyrolytic graphite and graphite powder
T. Tran (Livermore, CA, USA) and K. Kinoshita (Berkeley, CA, USA) . . . . . 221

A four-electrode microcell for electrochemical measurements at the interface between two immiscible electrolyte solutions
Z. Samec, A. Trojánek and E. Samcová (Prague, Czech Republic) . . . . . 225

Combined Raman and photoelectrochemical imaging system. Application to $TiO_2$ films grown anodically on Ti–Ag alloy
K. Ajito, J.P.H. Sukamto, L.A. Nagahara, K. Hashimoto and A. Fujishima (Tokyo, Japan) . . . . . 229

Phase transitions in thymine adlayers on silver single crystal electrodes
M.H. Hölzle, D. Krznarić and D.M. Kolb (Ulm, Germany) . . . . . 235

Electrochemical oxidation of glucose by $Pt/WO_3$ electrode
X. Zhang, K.-Y. Chan (Pokfulam Road, Hong Kong) and A.C.C. Tseung (Colchester, U.K.) . . . . . 241

EQCM monitoring of charge transport processes in polyaniline films doped with 12-silicomolybdic heteropolyanion
B. Keita, A. Mahmoud and L. Nadjo (Orsay, France). . . . . 245

A new type of current oscillation in polypyrrole membranes produced by electrochemical potential control
M. Iseki, M. Ikematsu, Y. Sugiyama, I. Tago and A. Mizukami (Ibaraki, Japan). . . . . 253

Electrochemical reduction of high pressure carbon dioxide on Fe electrodes at large current density
K. Hara, A. Kudo and T. Sakata (Yokohama, Japan) . . . . . 257

Electrochemical quartz crystal microbalance study of silver ad-atoms on highly ordered Au(111) electrodes in sulfuric acid
H. Uchida, M. Miura and M. Watanabe (Kofu, Japan) . . . . . 261

Adsorbate-induced surface stress at the solid | electrolyte interface measured with an STM
W. Haiss and J.K. Sass (Berlin, Germany) . . . . . 267

*Announcement* . . . . . 271

*Author index* . . . . . 273

*Subject index* . . . . . 275
